iHeartRadio operations *(iPhone or Android device)*

What is iHeartRadio?

iHeartRadio can deliver access to over 1500 local radio stations in both AM and FM, as well as commercial-free and artist-programmed channels. All stations are streamed in high-quality AAC format. You can listen to iHeartRadio on this unit by using the "iHeart Link for JVC" application on an iPhone or Android device.

1 **Install the latest version of the iHeart Link application to your device.**

2 **Start the iHeart Link application by your device.**
3 **Connect your device to the unit .**
- When using an iPhone
  For connection, use a USB2.0 cable (accessory of the iPod/iPhone) or a USB Audio and Video cable for iPod/iPhone (KS-U49, not supplied).

The [★+] button is not available when listening to a station that has already been stored as a favorite.

Create custom stations

A new custom station is created by selecting the current song being listened to. The new custom station is added to [**My Stations**]-[**Custom Stations**] in the Stations list.

## Tagging songs and purchasing songs from the iTunes Store (Only iPhone)

iHeartRadio provides tag information for each song.

1 Press [Tag].
While listening to a song with tag information:
"Tags transferred to iPod" appears.

The tag information is transferred to iPhone, and the Tag button is grayed out (is inactive).

2 Purchase the song from the iTunes Store.

① Connect the iPhone to the computer.
② Synchronize the iPhone to iTunes.
Tagged information is transferred to the computer and a list of tagged songs is displayed in iTunes.
After the tag information is transferred, the stored Tag information are automatically deleted from the iPhone.
